

\*Look closely at the goblet. There are three yellow stars, two at the top rim and one at the bottom left base. These stars mark where the folds will be at, that keep the book together. So remember as you cut out the goblet do not cut on the fold at the stars. Before cutting,, fold on each dotted

line accordion style. The Goblet should be on top as the cover. Once folded begin to cut out the goblet leaving a 1/4 white border around it for stability. Remember to be careful not to cut the folds at the Stars.

Circle books: Cut out on solid black line. Fold on dotted line. Cut each circle book out making sure not to cut on the fold. Fill in the information. If you need more pages just fold some lined paper in half place the circle book over it. Draw around the book, remove the circle book and cut out the lined paper. Insert in the lined paper and staple in the center on fold.
