

Cut out book as one piece and fold on dotted line so cover is on top. Cut out all pages of book on solid lines. Stack left side pages, and stack right side pages. Pages will be stapled inside book onto back page, on both the right and left sides. Stagger pages so that they open every other way, ie: left page, then right page, then left page, etc. Have child glue clipart onto appropriate pages.

These are a few of
my favorite things...
