

**IN
A
CAVE**

Cut out book on previous page. Fold in half.

Cut out cave piece on the dotted lines. Cut around the black hole in the cave. Cut all around the door, but DO NOT cut the left side (this is where the door will stay attached). You do need to cut around the bottom; you want the door to be able to open and close. Glue cave to the inside of the "In a Cave" book. Do not put any glue on the door.

Put a Velcro dot on the back of Angus. You will also need one on the inside of the cave door and one somewhere on the outside of the cave. Let your student put Angus IN the cave and take Angus OUT of the cave. You can use this to teach the words *in* and *out*. You can also let your student play with it (and act out part of the story).
