

SEED GROWTH

Cut rectangles apart. There will be seven total. Stack in order (with the smallest on top and the largest on bottom) and staple at the top to create a layer book. Use this book to chart seed growth (if you choose to plant seeds this week). When your student observes something new, let him draw a picture on the page to represent the growth. Write the day number (i.e. Day 10) at the bottom of the page, so that it can be seen from the outside of the book.
