

Cut along the solid line. Color the territory of the four types of foxes mentioned in the unit each a different color. Color the box next to each type of fox the color that you colored it's territory. Because there are over-lapping territories, it may be helpful to color the territories with stripes or dots. Glue the map into your lapbook.(OR cut three pieces of velum to fit over the map. Staple them to make three overlays over the map. Using a different colored marker color a different foxes territory on each overlay. Don't forget to color in the key on the right.) Glue into lapbook.
