

# Tadpole

# Frog

Cut on the dotted lines so that you have two pieces (tadpole and frog). Cut book on next page out as one piece. Fold in half. Glue the tadpole piece on one side and the frog piece on the other. Let your student write the differences under the headings (or cut apart the already typed up descriptions and let your student paste them on the appropriate sides).

eaten by dragonfly larvae and water beetles	eaten by snakes and birds
lives in the water	lives on land near water
has a tail and growing legs	has four legs

Tadpole

or

Frog

breathes with gills

breathes with lungs through skin

senses: smell and vibration

senses: sight, hearing
