

Ordinal Numbers

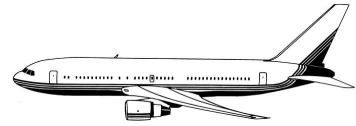

Ninth

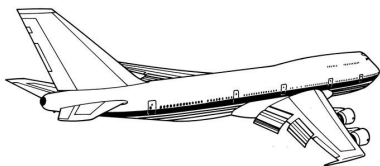

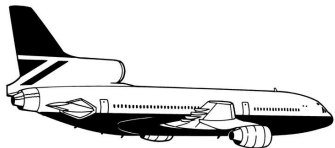

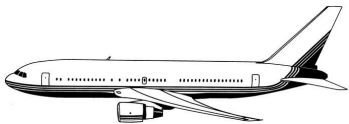

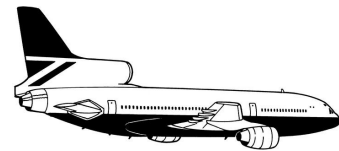

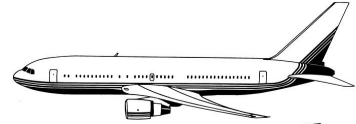

Tenth

Fourth

First

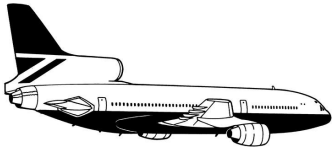

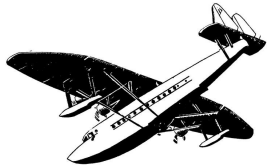

Fifth

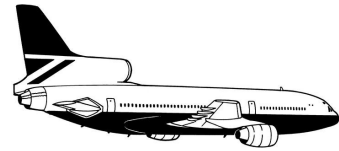

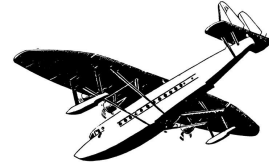

Eighth

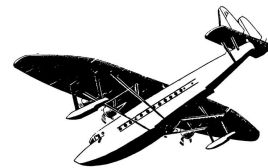

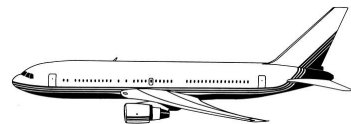

Second

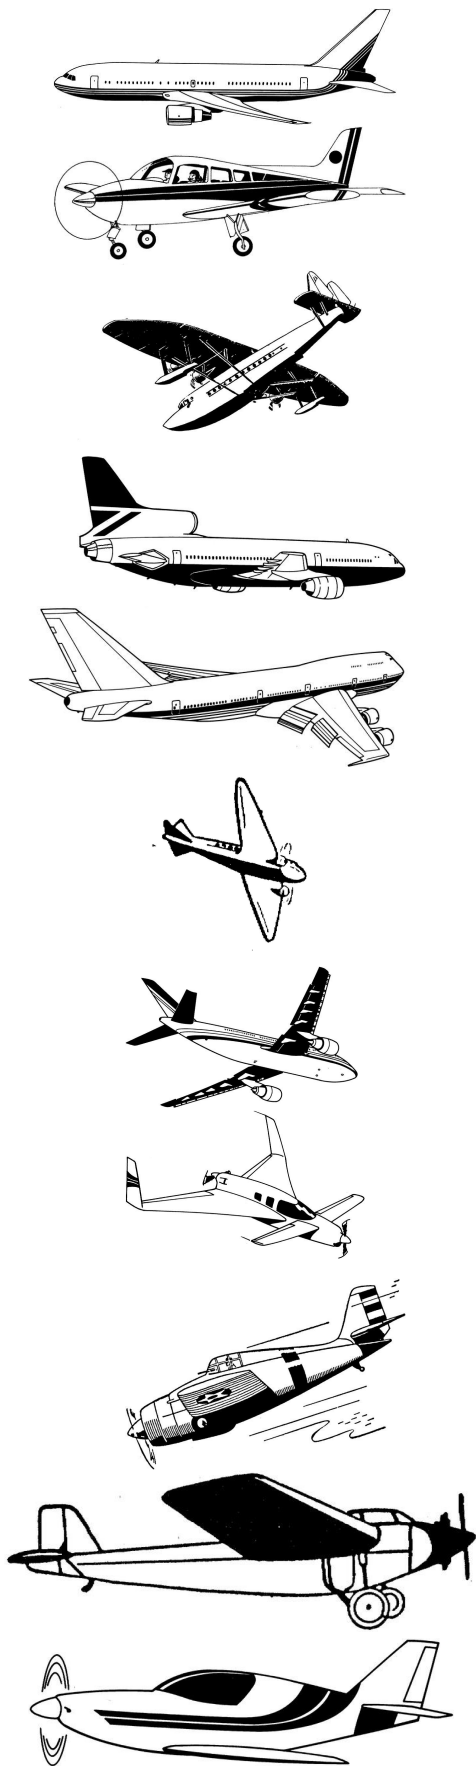

Seventh

Sixth

Third

Eleventh

After you complete the ordinal numbers on page 51 of your FIAR Volume I manual, use this book for reinforcement.

Cut out each rectangle. Put the rectangles in order (smallest to largest) and staple at the very top of the book.

On the "first" page, let your student circle or draw an arrow to point to the first (and only) plane. On the "second" page, let your student circle or draw an arrow pointing to the second plane. Continue this same exercise.

As you look at each page, be sure to point and say "first, second, third, etc." to help your student remember the ordinal numbers.
