

*Quail Facts*

Cut out shapes on dotted lines.

After your student does some quail research (or after you've read a library book about quails together), let him write down quail facts on the pages (one per page). Use as many as you need (you certainly don't have to use them all but you can print more if you need more).

When she's finished, stack together and attach the minit book together with a staple or brass fastener.
