

Use a map to help you find the following states and color them as indicated on the map below.

Solid Color: New Mexico, Arizona

Dotted: Texas, Nevada, Utah, Oklahoma, southern Colorado, and southern California

Cut book on previous page out as one piece. Fold in half. Follow the instructions provided. Cut cover piece (on this page) out and glue to front cover.

Please note that the Southwestern United States, commonly referred to as the Southwest, is a region of the western United States. Regional definitions of this area vary from source to source. The Southwest almost always includes New Mexico and Arizona, but often takes in western Texas, the southern portions of Nevada, Utah, and Colorado, western Oklahoma, and southeastern California. So, your student will color the states that are commonly considered SW states and dot the ones that aren't always agreed upon.
