

Cut out book. Fold in half.

Cut out book on next page. Fold in half. Unfold and cut on dotted lines to form five flaps. Cut apart definitions. Let your student glue the correct definition under each flap.

Glue smaller book into the cover book. The cover book will help protect the flaps.

- cloud of ash formed by a volcano exploding
- the hot, liquid rock that is formed by a volcano exploding
- the holding tank for the magma
- the opening in the earth that allows the magma to flow out on to the surface of the earth
- a steep-sided hole at the top of the volcano that sometimes contains a pool of lava
