

WHAT'S ON THE MENU?

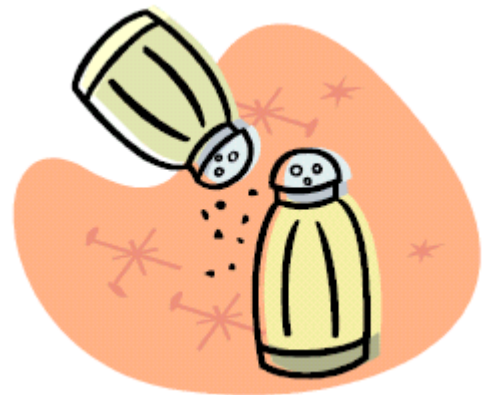

Tide Pool Food Chains

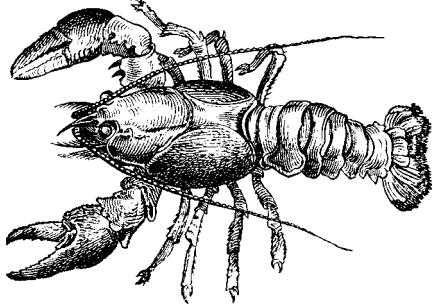

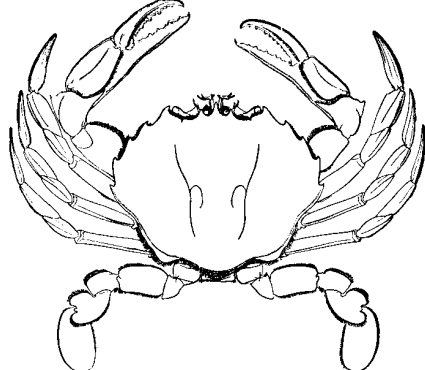

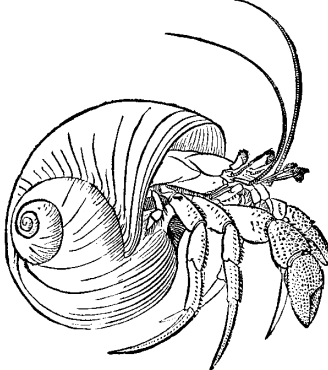

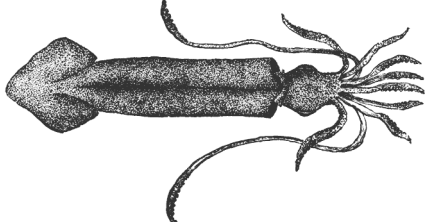

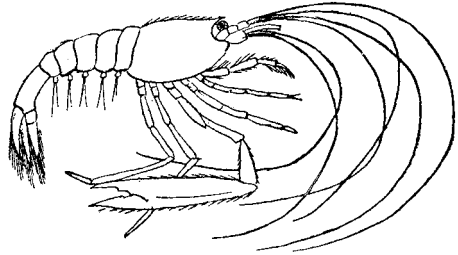

What makes ocean water salty?

Handwriting practice area consisting of multiple sets of horizontal lines (solid top and bottom lines with a dashed midline) for writing an answer.

Additional handwriting practice lines for writing an answer.

Pictures for Animal Reports

 A detailed black and white line drawing of a lobster, shown from a side profile. It has two large pincers (claws) at the front, several pairs of legs, and a segmented tail fan at the back.	 A black and white line drawing of a jellyfish. It features a bell-shaped, dome-like top with a textured surface, and numerous long, thin, wavy tentacles hanging down from the bottom edge.
<p>lobster</p>	<p>jellyfish</p>
 A black and white line drawing of a crab, viewed from above. It has a broad, flat carapace (shell) with a central opening, and four pairs of legs extending from the sides.	 A black and white line drawing of a hermit crab. The crab is curled up, with its body tucked inside a large, spiral, shell-like structure. Its legs and antennae are visible extending from the shell.
<p>crab</p>	<p>Hermit crab</p>
 A black and white line drawing of a squid. It has a long, tapered mantle (body) with a bulbous head at the front. From the head, several long, thin tentacles extend outwards.	 A black and white line drawing of a shrimp, shown from a side profile. It has a segmented body, a pair of large pincers at the front, and several pairs of legs. The tail fan is visible at the back.
