

Pictures for Chapter 3 Animal Reports

 A detailed black and white illustration of a lobster, shown from a side profile. It has two large pincers (chelae) at the front, several pairs of legs, and a segmented tail fan (uropods) at the back.	 A black and white illustration of a water flea, also known as a Daphnia. It has a rounded, protective brood pouch (marsupium) on its back, which contains several small, dark, oval-shaped eggs. It has long antennae and several pairs of legs.
<p>Lobster</p>	<p>Water flea</p>
 A black and white illustration of a crab, shown from a top-down perspective. It has a broad, flat carapace (shell) with a central opening, and four pairs of legs. The front two pairs are significantly larger and more complex than the others.	 A black and white illustration of a crawfish, shown from a side profile. It has a segmented body, two large pincers at the front, and several pairs of legs. The tail fan is visible at the rear.
