

Distress Flares:

- Are an important item of safety on ships.
- Are used to raise the alarm that a ship is in distress.
- Act to pinpoint location to assist search and rescue teams in finding the distressed ship.
- Are very useful for helping in early rescue operations.
- Have different types and colours that are used during the day and night.
- Can be seen over long distances and for different lengths of time.

Distress Flares:

Cut out as one piece and fold the information page over the colouring picture to create a flap.

Cut out the title box and glue to the cover of the information page.

Colour in the ships' distress flaming rocket flare in yellow, orange, red and white. Colour the background black.
