

Maple Tree Life Cycle Wheel

Print out both wheels on card stock. Print out images on paper. Cut out Wheel 1 around outer edge. Cut Wheel 2 (which will be slightly smaller than Wheel 1) around outer edge, and also cut out one quarter of wheel where marked. Cut out images and have child glue them in order around Wheel 1. Place Wheel 2 over Wheel 1, and poke a brad through the center. Turn Wheel 2 to expose each stage of a maple tree's growth, having child explain.

Cut this quarter out. Turn
circle over so lines don't
show.
