

Cut book out as one piece and fold accordion style.

Ideas for this book:

1. cut out square things from magazines and paste one in each square
2. let your student draw something square on each square
3. let your student write the definition of square (found on FIAR Volume I page 46).
4. do something different with each square (we will probably draw an actual square, cut and paste something square, draw a picture of something we find that's square, and write the definition of a square as found in our FIAR manual).
