Cut out skates. Staple the front cover (staple on the right side). Open skate shaped book. Cut out letter pieces. Glue one /sk/ piece on each side of the open book. One needs glued so that letter pieces can fit in FRONT of it; the other /sk/ piece should be glued on the other side of the book so that letter pieces can fit BEHIND it. Affix a Velcro dot in front of one /sk/ and another behind the other /sk/.

Affix Velcro dots to the backs of all the other letter pieces. Affix Velcro dots in the skate so that word pieces can be stored. Your student should be able to manipulate the pieces to form the following words: skate, sky, skill, mask, desk, and tusk. If you don't have Velcro dots, your student can simply match the words up and glue them in the book.
