

Cut book out. Fold on lines (matchbook style). Child can draw a web on the cover or cut and paste graphic. Answer is provided to cut and paste if needed. For where spiders live child can draw one place a spider lives or cut and paste answers provided. [www.homeschoolshare.com](http://www.homeschoolshare.com)

# Spider Webs

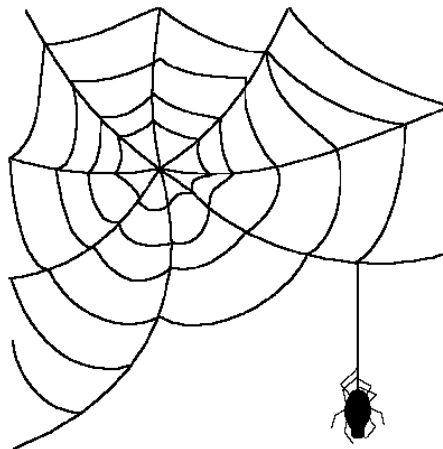

Where do  
spiders  
live?

Spiders make different kinds of silk for webs. Silk can be sticky, smooth, or even waterproof.

There are many kinds of spider webs.

A spider hatches already knowing how to spin a web, nobody teaches a spider how to make a web.

fields  
swamps  
woods  
caves  
deserts  
underwater  
in buildings  
on ships  
Almost anywhere!
