

This file contains two separate books. To assemble the first book, cut out strip above as one piece. Fold into thirds. On the inside you will have three spaces. Write the three different names for the dad, mom, and baby bear (boar, sow, and cub).

The book below is a T-book. Cut out as one piece. Fold each flap in ("Where can I find.." should be on the front as it is the cover). Let your student write the five different places where polar bears are found (you will need to use both sides of the top flap in order to have five spaces).
