

# Kinds of Mountains

When two of Earth's plates push against each other.

## Fold

When hot volcanic magma can't break through Earth's surface. Magma pushes rocks toward the crust into a dome shape.

Earth's crust heave a block of land up.

## Dome

## Block

**When magma, rock, gas and ash gradually build up in a cone shape around an eruption.**

**Volcano**

Have student draw a picture of each type of mountain.
