-------------	---------

a crumbly, lumpy type of lava that moves slowly and can form tall flows

the name for magma that has erupted to the surface

<p>very small, fine particles of lava that can block out sunlight</p>	<p>most common kind of volcanic rock, made from very runny lava</p>
<p>volcanic vent on the sea floor that belches out hot minerals</p>	<p>the metallic center of the Earth</p>
<p>part of a volcano that connects to the main chimney and out of which lava and ash erupts</p>	<p>the hard, outer layer of the Earth</p>

<p>volcano that has not erupted for a long time, but could again</p>	<p>when lava, ash or gas explodes out of a volcano</p>
<p>a volcano that can't erupt again</p>	<p>a crack in the Earth's crust where rocks have moved</p>
<p>a place where under ground water, heated by magma, spurts into the air</p>	<p>a crack in the ground that runny lava oozes out of</p>

a place where rising magma
burns through the Earth's
crust

a place where hot water
from under the ground
bubbles to the surface

part of the Earth's interior

rock deep in the Earth that
has erupted to the surface

rock formed from other rocks
that are under intense heat
and pressure

hot, runny lava that moves
freely in shallow flows

the moving part of the mantle and crust

place where two plates are pulling apart to create a crack in the crust

area in the Pacific Ocean that includes many of the world's most active and violent volcanoes

machine that measures movement of the Earth's surface

destructive sea wave that can be caused by underground volcanic eruptions or earthquakes

Have student write definition or glue provided definition on appropriate file folder. Due to the number of vocabulary words, divide into as many books as necessary.
