January	31	Discard this blank area.
February	28 / 29 Leap Year	
March	31	
April	30	
May	31	
June	30	
July	31	
August	31	
September	30	
October	31	
November	30	
December	31	

Instructions:

Laminate entire first sheet, as is. On the second sheet, cut apart the months and the number of days and laminate the pieces such that each individual piece (24 pieces) can be cut around after it's laminated.

Attach two small pieces of Velcro on each row of the first sheet, ensuring that they are wide enough apart to place both of the pieces that go on each row. Attach a small piece of Velcro on the back of each laminated piece.

Store all pieces in a Ziploc baggie or an envelope.

Challenge the student to place the months in their correct order and to place the days in each month beside the month name.
