

ABOVE

BELOW

HIGH

LOW

Cut cards out. Cut out balls. Paste cards into lapbook.

Put Velcro dots on the backs of the balls. This will allow your student to manipulate the balls. Ask him to put it above the birds. Then ask him to put it below the birds. Ask him to put one high then to put one low.

You may want to practice these concepts in other ways around your house as well.

Note; If you don't have any Velcro dots, your student can glue the dots down, but he won't be able to review the concept.
