Winter  
Penguins

# Roll and Cover Winter Penguins

## Instructions:

### One player game:

Print one board.

Player throws the dice and adds the sum of both. For example, if the player throws a 3 and a 4, the total is 7.

The player can then cover anything equal to seven. So, the player could cover  $3 + 4$ ,  $2 + 5$ ,  $6 + 1$ , or 7.

The player chooses whether she wants to roll one die or both. This becomes important as more numbers are covered.

If the player cannot use the throw to cover numbers (i.e. if the player's dice total is 7 but the 3, 4, 2, 5, and 7 are already covered), the player should re-roll.

### Multiplayer game:

Print a board for each player.

Players take turns throwing the dice.

If a player cannot use the throw to cover numbers (i.e. if the player's dice total is 7 but the 3, 4, 2, 5, and 7 are already covered), the player loses his turn and the next player rolls.

The first player to cover every number on his or her board wins.
